Uncluttered Display of High Resolution Full Card Graphics

ABOUT ELECTRO-SPORT'S GAME

SKILL DRAW POKER is designed to meet requirements and definitions of a game of individual skill.
It is also designed with the purpose of providing multiple options and features to enhance the enjoyment and amusement of the players.
Four games in one are offered as individual or in any combination.

THE GAMES

DRAW POKER — Traditional high resolution card characters present challenge and entertainment for players.

JOKERS UP® — Consider the game of draw poker around a table of skilled players and the dealer's choice is Jokers Up! Electro-Sport allows this option to be selected for one Joker or two. Screen graphics will display for the player the announcements of "Deck has one Joker" or "Deck has two Jokers."

DOUBLE UP — Upon winning, due to skill, the player may decide to draw a card for double or nothing, an event not uncommon at the end of many home poker games.
The game may have this feature on a random basis or all the time.
Electro-Sport's game presents an uncomplicated keyboard array with flashing indicators for the player's choice.
The game may have this feature all of the time or on a random basis.

BONUS POKER® — A unique and new feature for Draw Poker games.
Without additional coins on a play of four credits or more, the player may be awarded a bonus of double the odds of skill credits on any winner. The announcement of Bonus Poker will be displayed on the draw.
This game has this feature on a random basis.
